

The logo for ENGIE, featuring the word "ENGIE" in a bold, white, sans-serif font. The letters are slightly shadowed, giving them a three-dimensional appearance as if they are floating above a dark, reflective surface. The background of the logo area is a vibrant purple with a geometric, faceted pattern.

AV Technologies

Audio visual is no longer an aesthetic extension to your working environment, it is a mission critical staple of operations that must guarantee usability, adaptability and reliability for as long as the system is in place.

Our approach to research and development is combined with a passion and drive to always be at the forefront of our field. This ensures our customers walk away with solutions that not only meet the developing trends in AV, but are designed to exceed and outlast the technology curve.

We manage all aspects of your Audio Visual installation including design and engineering, project management, installation, programming all the way through to testing and training.

The end result is then supported with one of our custom-designed service and support offers that guarantees your system stays fully functional and operational for the life of your installation.

Whether your requirements are as acute as a meeting room or as demanding as a 500 seat auditorium, ENGIE AV Technologies has the experience, the understanding and the attitude to make your environment work, first time every time.

## ENGIE SERVICES AV TECHNOLOGIES

WHERE THE PREMISE OF DESIGN IS THE POWER IN USER EXPERIENCE

### NETWORKED AV

Distribute and Manage your Audio Visual solution utilizing your existing IP infrastructure.

### REMOTE MANAGEMENT

Know that your system is 100% operational, 100% of the time with a custom designed support and maintenance schedule.

### COMPATIBILITY

Take the worry out of device support by ensuring universal compatibility across all devices and endpoints.
